

POSTERS

50. LITHIUM INHIBITS CARCINOID CELL GROWTH IN VITRO AND IN VIVO

David Y Greenblatt, Li Ning, Mary Ndiaye, , Herbert Chen, and Muthusamy Kunnimalaiyaan
University of Wisconsin

51. SYSTEMIC HYPOCALCEMIC CHALLENGE ENABLES SUCCESSFUL SEMI-SELECTIVE
VENOUS SAMPLING FOR PERSISTENT HYPERPARATHYROIDISM

Lilah F. Morris, Christopher T. Loh, , Amy S. Asandra, James E Wiseman, Antoinette S.
Gomes , Samuel Wairiri, Michael W Yeh
David Geffen School of Medicine at UCLA

52. PREOPERATIVE 99MTC-SESTAMIBI LOCALIZATION PREDICTS
INTRAOPERATIVE PARATHYROID HORMONE DYNAMICS IN PRIMARY
HYPERPARATHYROIDISM: AN ANALYSIS OF 855 CASES

Susan C. Pitt, Rajarajan Panneerselvan, Rebecca S. Sippel, Herbert Chen
University of Wisconsin

53. DURABILITY OF MINIMALLY INVASIVE PARATHYROIDECTOMY IN YOUNG
PATIENTS WITH PRIMARY HYPERPARATHYROIDISM

Jennifer J. Oucharek, Christine J. O'Neill, James W. Suliburk, Mark S. Sywak, Leigh W.
Delbridge, Stan B. Sidhu
University of Sydney Endocrine Surgical Unit

54. RADIO-GUIDED EXPLORATION FACILITATES SURGICAL CYTOREDUCTION OF
NEUROENDOCRINE TUMORS.

Yi-Zarn Wang, Abby E Gandolfi Lowell B. Anthony, Richard Campeau, Eugene Woltering, J.
Philip Boudreaux
Louisiana State University Health Sciences Center

55. DOES THE INITIAL TREATMENT OF PARATHYROID CARCINOMA AT A HIGH-
VOLUME CENTER CONFER A SURVIVAL ADVANTAGE?

Insoo Suh, Avital Harari, Elliot Mitmaker, Raymon H. Grogan, Ann Griffin, Jessica E.
Gosnell, Quan-Yang Duh, Orlo H. Clark, Wen T. Shen
University of California, San Francisco

56. PERSPECTIVES OF ROBOT ASSISTED THYROIDECTOMY IN THE MANAGEMENT
OF THYROID CARCINOMA FROM THE YUMC EXPERIENCE OF CONSECUTIVE 1000
CASES

Sang-Wook Kang , So Hee Lee , Haeng Rang Ryu , Kang Young Rhee , Jong Ju Jeong , Kee-
Hyun Nam and Woong Youn Chung

Department of Surgery, Yonsei University College of Medicine

57. LEARNING CURVE OF ROBOT-ASSISTED THYROIDECTOMY FOR THYROID
CANCER

Sang-Wook Kang , Jandee Lee , So Hee Lee , Haeng Rang Ryu , Kang Young Rhee , Jong Ju
Jeong , Kee-Hyun Nam and Woong Youn Chung

Department of Surgery, Yonsei University College of Medicine

58. SURVEILLANCE AND INTERVENTION FOLLOWING THYROID LOBECTOMY

Philip M. Spanheimer, Kristopher M. Day, Sonia L. Sugg, Geeta Lal, James R. Howe, Ronald
J. Weigel

University of Iowa, Department of Surgery

59. MORE STRINGENT CRITERIA ARE REQUIRED FOR IOPTH MONITORING IN
MULTIGLANDULAR PARATHYROID DISEASE

David T. Hughes, Barbra S. Miller, Gerard M. Doherty

University of Michigan

60. SINCE THE INTRODUCTION OF MINIMALLY INVASIVE PARATHYROIDECTOMY
FOR PRIMARY HYPERPARATHYROIDISM THE INCIDENCE OF MULTI-GLAND
DISEASE HAS DECLINED; HYPERPLASIA SEEMS TO BE RARER THAN GENERALLY
PRESUMED.

Bas A. Twigt, Anne M. Vollebregt, Menno R. Vriens, Inne H.M. Borel Rinkes, Thijs v. Dalen
University Medical Center Utrecht

61. THE NEW SCORING SYSTEM BASED ON CYTOLOGICAL AND ULTRASOUND
FEATURES COULD PREDICT THE MALIGNANCY IN PATIENTS WITH FOLLICULAR
LESION ON FNAC OF THE THYROID

Ben selvan, Jennifer, Paul MJ, Deepak Abraham, Aravindan Nair

Christian Medical College, Vellore

62. DNA BASE EXCISION REPAIR GENE XRCC1 SINGLE NUCLEOTIDE
POLYMORPHISM VARIANT IS ASSOCIATED WITH AN INCREASED RISK OF LYMPH
NODE METASTASES IN PATIENTS WITH PAPILLARY THYROID CANCER

Guennadi Kouniavsky, Yongchun Wang, Alan P. B. Dackiw, Christopher B. Umbricht, and,
Martha A. Zeiger

Johns Hopkins University School of Medicine

63. PRIMARY HYPERPARATHYROIDISM IN THE UNINSURED: A STUDY OF 527
PATIENTS

Azad A. Jabiev, John I. Lew, Jane L. Garb, , Carmen C. Solorzano

Baystate Medical Center, Tufts University School of Medicine; University of Miami Miller School of Medicine

64. REAL-TIME IMAGING OF TUMOR PROGRESSION IN AN ORTHOTOPIC MOUSE MODEL OF RED FLUORESCENT PROTEIN-EXPRESSING THYROID CANCER

Hop S. Tran Cao, Sharmeela Kaushal, Cynthia S. Snyder, Weg M. Ongkeko, Robert M. Hoffman, Michael Bouvet
University of California, San Diego

65. FAMILY HISTORY OF THYROID CANCER IS THE STRONGEST PREDICTOR OF POSITIVE CERVICAL LYMPHADENOPATHY FOUND ON PRE-OPERATIVE ULTRASOUND IN PATIENTS WITH PAPILLARY THYROID CANCER

Nephtali R. Gomez, Guennadi Kuoniavsky, Hua-Ling Tsai, ScM, Zita Shiue, Helina Somervell, NP, Anthony P. Tufaro, Sara I. Pai, Ralph P. Tufano, Christopher Umbricht, Jeanne Kowalski, Alan P.B. Dackiw, Martha A. Zeiger
Johns Hopkins University School of Medicine

66. THE ROLE OF CONTRAST ENHANCED COMPUTED TOMOGRAPHY IS COMPLEMENTARY TO ULTRASOUND IN THE PREOPERATIVE DIAGNOSIS OF CERVICAL METASTATIC ADENOPATHY IN PAPILLARY THYROID CARCINOMA

Robert Tasevski, David P. Goldstein, Dale H. Brown, Eric S. Bartlett, Eugene Yu, Sylvia L. Asa, Lorne E. Rotstein
University of Toronto

67. PATIENTS WITH PRIMARY HYPERPARATHYROIDISM PRESENT WITH SIGNIFICANTLY LOWER VITAMIN D LEVELS THAN PATIENTS WITH BENIGN THYROID DISEASE

Catherine E. Pesce, Guennadi Kouniavsky, Hua-Ling Tsai, Zita Shiue, Jeanne Kowalski, Martha A. Zeiger
Johns Hopkins Hospital

68. A NOVEL SCORING SYSTEM FOR SESTAMIBI AND SURGEON-PERFORMED ULTRASOUND FOR PRE-OPERATIVE LOCALIZATION IN PARATHYROID SURGERY

Katy H. Carpizo, Mira M. Milas, Jamie Mitchell, Allan E. Siperstein, and Eren Berber
Cleveland Clinic Foundation

69. PRIMARY HYPERPARATHYROIDISM PATIENTS WITH POSITIVE PRE-OPERATIVE SESTAMIBI SCAN AND NEGATIVE ULTRASOUND ARE MORE LIKELY TO HAVE POSTERIORLY LOCATED UPPER GLAND ADENOMAS

Avital Harari
UCSF

70. EXPERIENCE IN PARATHYROID LOCALIZATION USING 4D-COMPUTED TOMOGRAPHY

Philip W. Smith, Virginia B. Simpson, Scott R. Geraghty, John R. Gaughen, John B. Hanks
University of Virginia

71. GLOBAL TYROSINE KINOME PROFILING OF HUMAN THYROID TUMORS IDENTIFIES SRC AS A PROMISING TARGET FOR INVASIVE CANCERS.

Nancy L. Cho, Chi-iou Lin, Jinyan Du, Edward E. Whang, Hiromichi Ito, Elliot J. Mitmaker, Wen T. Shen, Francis D. Moore, Jr., Daniel T. Ruan
Brigham & Women's Hospital

72. CHANGING INTRAOPERATIVE PARATHYROID HORMONE COLLECTION SITES FROM PERIPHERAL TO CENTRAL DOES NOT AFFECT PREDICTIVE ACCURACY DURING PARATHYROIDECTOMY

Sherif R.Z. Abdel-Misih, James Broome, Xiaobai Li, Eugene P. Chambers, J. Kenneth Jaco, John E. Phay
The Ohio State University Medical Center/James Cancer Hospital

73. PRIMARY HYPERPARATHYROIDISM IN PATIENTS UNDER 40: PREOPERATIVE AND INTRA-OPERATIVE FINDINGS

Adam D. Laytin, Robert T. Lewis, Douglas L. Fraker
University of Pennsylvania

74. PSEUDO-PHEOCHROMOCYTOMAS: ADRENO-CORTICAL LESIONS MIMICKING PHEOCHROMOCYTOMAS

Jonathan G. Sham, Robert T. Lewis, Kenechi Ebede, Kathleen T. Montone, Virginia A. LiVolsi, Douglas L. Fraker
University of Pennsylvania

75. GALECTIN-3 IS A NOVEL THERAPEUTIC TARGET TO REDUCE CORTISOL SECRETION AND IMPROVE CHEMOSENSITIVITY IN ADRENOCORTICAL CANCER

Chi-Iou Lin, Edward E. Whang, Wan-Hui Liao, , Ulf J. Nilsson, Jinyan Du, Nancy L. Cho, Hiromichi Ito, Francis D. Moore, Jr, Daniel T Ruan
Brigham and Women's Hospital

76. A PREDICTIVE MODEL FOR MULTIGLAND DISEASE IN PATIENTS WITH PRIMARY HYPERPARATHYROIDISM

David F. Schneider, Peter H. Anastopoulos, Daniel J. Weber, and Steven A. De Jong
Loyola University Medical Center

77. OCCURRENCE AND PREDICTION OF PATHOLOGICAL OUTCOMES IN PATIENTS WITH COEXISTENT FOLLICULAR ADENOMA AND PAPILLARY THYROID CARCINOMA

Tricia A. Moo-Young, Dawn P. Bradly, Subhash Patel, Richard A. Prinz, Paul Gattuso
Rush University Medical Center
